

# COMMISSION SYSTEM

## WHY EMS?

To be successful in any industry it is mandatory that you compensate your team in a timely manner. ATI's commission system effectively helps you achieve this by providing a sensible commission calculation system which is both simple & accurate. Our solution saves you time & money by providing a fully automated commission calculating interface. Users have the ability to access data from any device anywhere in the world from our web based platform.

**COST EFFECTIVE**

**SIMPLE**

**EFFICIENT**

**COMPLIANT**

## WHAT CAN EMS DO FOR YOU?

- EMS can be integrated in any platform where commission payment structures are relevant.
- Provides real time and pin-point accurate commission calculations that simplify existing LOS calculation features that if mismanaged within the system, can be dangerous to any mortgage business.
- As the mortgage banking industry evolves, products change and regulations become more detailed, thus making the payment processing to production personnel that much more challenging.
- Some LOS systems have a clunky out dated system for these calculations and some have nothing at all. Now you don't need one, just plug in our customizable solution and get back to work.
